

You can join in clearing negative vibration influences from the atmosphere for allowing more Harmony as a City of Goodwill.

If you believe in Angels, then this Seed will appeal to you. Those who have the eyes to see tell us that our every thought, every feeling and every action does leave its own vibrational frequency in the atmosphere as forms of energy. Over time similar energy forms will attract to each other and build up in strength and influence. As an example, you may have noticed how some places feel light and uplifting, whilst others have a heavier negative feeling in the air. If you could quantify the residue levels of negative energy forms still hanging around from past history of lower nature expressions, that's all the past vandalism, rage, crime, hostilities, hate, anger, violence, oppressions, exploitations, resentments, arguments, etc. etc. etc. you will see the value in using this Seed for giving Harmony a chance to flourish as a positive influence. You will be aware of the different feelings between the positive energy of a sacred building as compared to places where negative expressions are predominant. Collectively, it is these energy forms that make up the overall feelings we get with each City. This Seed is for dissolving or neutralising residual negative influences from events of past history, so that more Harmony can be present for all. You do not need to use these exact words, you may want to use your own words. Your intention is what matters. With your heart in the right place and so long as you are not wanting to actually interfere or control the destiny of others, the Angels will know and answer your heartfelt request. Here is a suggestion to voice daily :

“ I ask of any and all Angel Beings to help us build the Harmony of our City by clearing the atmosphere in, around, and above this City, and to dissolve and remove all remnant negative energy vibrations built up from past anger, rage, crime, hostilities, violence, oppressions, exploitations and all residues of negative words, feelings and negative actions as may be still present as a lingering influence in the air, and I ask that the atmosphere of this City be infused with Clear Positive Benevolent Energy Vibrations so as to be an uplifting and healing blessing for all. Thank you “

I am a Seed of Harmony.....my job is to encourage more of something everyone can do towards making the atmosphere feel as a City of Goodwill. My inspiration has come from the book ' *The Gentle Way - A Guide for Those who Believe in Angels* ' by Tom T Moore. This is an excellent book for bringing wonderful and beneficial support into any persons life experiencesI highly recommend getting a copy for yourself and for those you love. I do hope that my presence has been a catalyst for you having a good day. You will find lots of Seeds for enhancing the good in your life at www.goodwillpeople.net *Come visit us.*
